

SANAKO Study Examination Module

Enhance Teaching Investments with more Functionality
– Plug and Play for Tests!

The SANAKO Study Module answers a growing demand for more intensive and accurate assessment of student progress. The Examination Module is a valuable tool for teachers, as spot examinations are an important component in continuous student evaluation. Using the module couldn't be easier: a 6-step "wizard" application simplifies the creation of tests, and is flexible enough to allow teachers to vary the type of questions used in tests.

The SANAKO Study Exam Player displaying questions created with the SANAKO Study Exam Wizard.

Easy test creation

The Exam Wizard can be launched from the Study teaching software, conveniently expanding the range of teaching activities that can be launched from the same interface.

More opportunities for testing and evaluation

Design any type of question to test a particular skill or student ability, using the helpful prompts and instructions in the Study Exam Wizard - use multiple choice, free response and more. Teachers may even set the time and outline instructions for tests before administering them, as well as preview entire exams. Once the teacher is satisfied with the design, launching the exam for students is only a click away!

SANAKO Exam Player

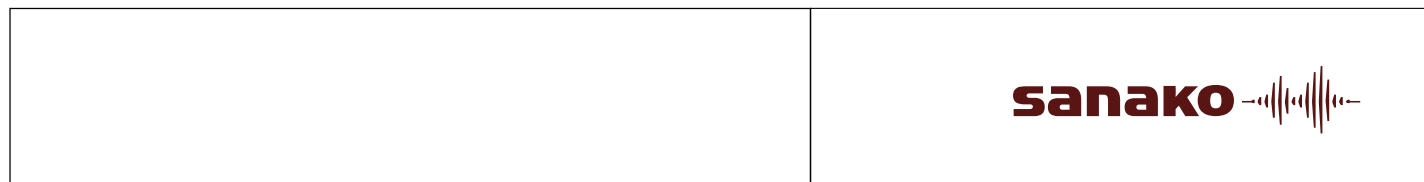

Students can easily and conveniently answer tests using the SANAKO Exam player. Teachers use the regular activity selection procedure in the Study 500 / 1200 Tutor interface to launch exam files for students. Once the teacher initiates the Examination activity in the Study tutor interface, exam files are played automatically for students on the SANAKO Exam Player, minimizing the time spent in getting tests started.

Students may also use the Exam player in stand-alone mode for additional exam practice or review, creating more opportunities for independent study with test material. To do this, students should double click on the exam file or use the "file/open" dialog to open an exam file (.exm) with the player. Once the file has been opened in this way, the exam playback procedure follows the same routine as if launched by the teacher.

Immediate feedback for students

The Examination Module provides important follow-up by generating test results for both student and teacher, allowing students to receive immediate feedback on their performance. The teacher may choose not to show students their results immediately. Teachers can also save exams for future use.

Advanced Technology from Finland

SANAKO Corporation

SANAKO Examination Module components

- SANAKO Exam Wizard - application for creating and editing exam files
- SANAKO Exam reports - application for viewing exam result files
- SANAKO Exam Player - application for playing the exam files

SANAKO Exam Module Licensing

Before using SANAKO Exam Wizard, it has to be registered online using a registration key provided by SANAKO. There are two types of registration keys available:

- Registration key for single registration. This key allows you to register SANAKO Exam wizard to be used with a single PC only
- Registration keys for multiple registrations. These allow you to register SANAKO Exam Wizard to be used with 15, 50, 100 or 200 PCs

Please note that it is also possible to unregister SANAKO Exam Wizard. After unregistering SANAKO Exam Wizard, you may use the same registration key again. Please contact SANAKO Support for more information.

In order to be able to use the Exam activity in SANAKO Study 500/1200, an appropriate Study product license needs to be used during the Study 500/1200 installation.

System requirements
