

SANAKO Study Lite Recorder Module

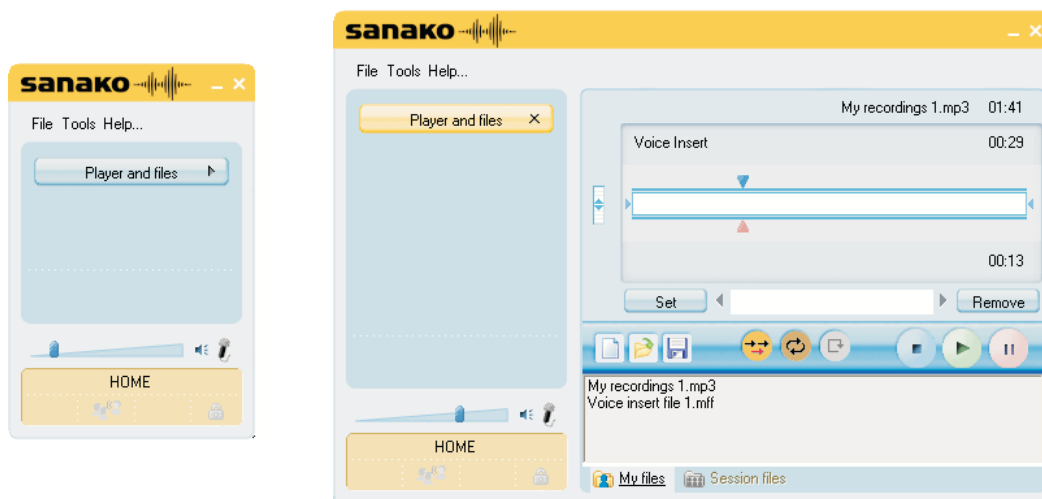

Provide your students with the optimal resources for motivating and continuous language learning!

The SANAKO Study Lite Recorder is a digital language learning tool that provides students with the optimum opportunity to develop their language skills independently both on- and off-campus.

The SANAKO Study Lite Recorder module is a stand-alone application intended for students' independent language studies. It is a two-track recorder with specialized language learning features similar to those in the Study 1200 Student recorder.

sanako

Independent and motivating learning

With the SANAKO Study Lite Recorder students are able to continue with language learning exercises at home for independent, motivating learning. Students of all levels will benefit from the opportunities for additional practice on their choice of subject and will see their performance improve.

Continuity and flexibility

Teachers can ensure the continuity of lessons and exercises from classroom to home, as well as the portability of learning content. Teachers and students will also enjoy the flexibility the Study Lite Recorder provides as the module can be installed throughout the entire school and students will have their choice of location for independent work.

Maximum value for investment

Learning institutions will be able to maximize the return on their investment on IT infrastructure when learning continues off-campus.

LANGUAGE LEARNING FEATURES

Student Voice Recording

Students can listen to their recorded voices and compare them to sample material for intensive practice in intonation, inflexion and accent reduction. The recording function of Study Lite Recorder also offers an efficient tool for student assessment.

Voice Graph

A graph can be viewed for both the program and student tracks. This visual representation of the voice track allows students to compare their recorded output to the original or model track for detailed speech analysis.

High Technology from Finland

Recap Functionality

The Recap function is designed to quickly repeat the previous sentence or part of the file. It permits students to review examples of authentic or native speakers in the target language.

Voice Insert

In the Voice Insert mode, gaps can be inserted automatically into source material, while students are recording their voices. This unique feature allows for the creation of exercises during playback.

Playback of SANAKO Media Assistant File Formats

The Study Lite Recorder allows students to make use of material created using the SANAKO Media Assistant. SANAKO Media Assistant is a unique digital recorder that allows teachers and students to record and playback multimedia learning material.
