

CHOOSE TO LEARN

The NOKIA N810 supports the drive towards personalization of media and Internet learning experiences - it will drive the uptake of such devices in education.

Moreover, as educators seek to provide more interaction and motivation in existing IT based learning, the NOKIA N810 will help educators achieve these goals by working alongside existing investments and resources.

Teachers need more than just technology – they need resources that help them deliver real teaching and learning benefits.

SANAKO SOLUTIONS FOR PERSONALISED DIGITAL LEARNING

SANAKO Study Mobile Module helps teachers to make the best use of these devices. It supports the meaningful integration of handheld devices into teaching to ensure that teaching and learning goals are achieved in a pedagogically correct manner.

Use of the SANAKO Mobile Module also helps schools address the challenge of creating coherent links between children's experiences of learning across different sites, at home and on the move.

SANAKO Study 500 offers learners a stimulating world of multimedia, Internet and creative original learning content for all subjects – in an environment where teachers can prepare for, deliver and manage lessons.

SANAKO Study 1200 is activity-based dynamic software specifically for language learning. In addition to the full range of language learning activities and a student recorder, the software has classroom management features that help teachers maintain focus within the interactive environment.

Teaching benefits include:

- Student screen locking to keep learners on task
- Voice and text communication to guide students and provide instant feedback
- Teacher-controlled web browsing
- Student thumbnails and screen monitoring
- Grouping for collaboration and interaction
- Extension of the learning environment to home and on the move

GUIDING PERSONALISED DIGITAL LEARNING

The Nokia N810 Internet Tablet provides mobility for learning in the Sanako system. It packs all the features of a PC into a pocket-sized device with Internet connectivity for web browsing and communicating via chat, instant messaging, and video-supported VOIP calls. Its built in flash player and sophisticated multimedia capabilities make it ideal for creating and managing photos, video and music. A full qwerty keyboard supports content creation in the classroom, on field trips, or at home.

With pre-installed SANAKO Study software, the Study Mobile Module allows the teacher to focus students within an interactive learning environment. This unique combination allows for traditional classroom learning and supports extending the learning environment in a number of creative and exciting ways by:

- Viewing of e-books to support classroom learning
- Use of educational on-line games to reinforce specific skills
- Audio and Video Recording of interviews, presentations, recording of lessons, voice notes using the Study Lite Recorder
- Prototyping and note taking, creating an electronic scrapbook for homework assignments
- General internet browsing for subject research
- Use of map information to support GPS, pictures, interviews done on field trips
